What’s New in the 2019 Maryland School Report Card?

The Maryland Report Card was introduced in 2018 and included all the data available at that time. This year, there are three additional pieces of data that are now part of each School Report Card.

1. **How Did My School Do Overall?**
   - For elementary and middle schools, the Academic Progress indicator now includes student performance on state science tests.

2. **School Quality and Student Success Indicator**
   - The School Quality and Student Success indicator now includes the results of a survey of students and educators.

3. **The Report Card**
   - The Report Card shows whether a school improved its performance on each indicator, compared to the previous school year.

The Maryland Report Card also has information on how each student group performed, and contains data related to equity (including comparisons between the performance of student groups at the school). You can locate this information under “Report Card Details” on the school’s online report card.

MSDE has developed a Maryland School Report Card User’s Guide to help you better understand the accountability system measures and School Report Cards. To see the latest School Report Cards, view the User’s Guide, and find more information, please visit: [MdReportCard.org](http://MdReportCard.org)
